

Josué Álvarez Rodríguez

Tlalpujahua, Mich · [Web Portfolio](#) · +52 712 305 0151 · arj1931126@gmail.com

More than 2 years of experience as a Full-Stack Developer, specialized in the creation of web portals and scalable applications. Expert in process optimization, modular architecture and secure development. Ability to lead teams and deliver efficient solutions that improve productivity and security of systems.

PROFESSIONAL EXPERIENCE

Turing Inteligencia Artificial S.A.S

Full Stack Developer

Mexico City

Nov 2023 - Oct 2024

- I led the design and development of 10+ management platforms with React/Node.js, accelerating implementation cycles by 25% through modular architecture.
- Implemented federated identity systems such as Okta and PingOne (SAML/JWT), reducing security incidents by 40% for 1,200+ users.
- I embedded Tableau Cloud and Google Looker Dashboards using SSO, improving data accessibility and security in customer portals.
- Designed and developed a portal implemented in Cloud Run to process, store and visualize +5k PDFs stored in Google Cloud Storage optimizing query times by 50%.
- Trained 100+ users on various enterprise platforms, reducing support tickets by 30% through interactive technical manuals.
- Coordinated recruitment and led the Software Development area, optimizing hiring processes.

Villanet S.A de C.V

Mobile Developer

Atlacomulco, Edo. Méx

Oct 2022 - Feb 2023

- I developed a mobile application for WISP payment management with PHP, MySQL and Android Studio automating billing and reducing transaction errors.
- Implemented MVVM architecture, improving modularity and maintainability of the code.
- Performed stability and security testing, ensuring reliable operation for +500 active clients.
- Modeled and managed MySQL databases, optimizing response times by 30%.
- The application improved operational efficiency by 20%, facilitating payments and reducing billing claims.

EDUCATION

Polytechnic University of Atlacomulco

Computer Systems Engineer

Atlacomulco, Edo. Méx

January 2023

COMPETENTE SUPLIMENTARE

- Frontend & UI: React, Angular, Tailwind, HTML/CSS
- Backend & DevOps: Node.js, Laravel, Django, Docker, GCP
- Native Spanish speaker. English B1 - Technical reading and basic communication in work environments.
- Object Oriented Programming: Knowledge of OOP in several projects; in the process of deepening in languages such as Java, C++ and C# to expand my expertise in robust and high performance systems.
